- Dice Roller (With Full Roll History)
- Bestiary & Companions (Pets, Familiars)
- Spellbook, Notes & Journal

Runs entirely in your browser · No installation required · All data saved locally

Getting Started

Chronicle runs entirely in your browser — no installation, no account, no internet required. Follow these steps to be up and running in under a minute.

- | | |
|---|---|
| 1 | Make sure all files are in the same folder
The application consists of one HTML file and a js/ folder containing all the JavaScript modules. Keep them together. If you move or rename the main HTML file, make sure the js folder comes with it. |
| 2 | Open the application in Google Chrome
Right-click the main HTML file, choose " Open with ", and select Google Chrome .
Chrome is recommended for the best experience. The app also works in Edge and Firefox, but Chrome gives the smoothest performance with animated themes. |
| 3 | Press F11 for a full-screen session
Once the app is open in Chrome, press the [F11] key. This hides all browser toolbars and tabs, giving you a clean, distraction-free interface that looks and feels like a native desktop application.
Press F11 again at any time to exit full-screen mode. |

Pro Tip — Full-Screen Mode

"F11 full-screen" is the single biggest quality-of-life improvement. Your entire monitor becomes the character sheet with no browser chrome in the way.

Your Data is Always Safe

All data is saved automatically in your browser's local storage. Every change you make is written within seconds of entering it. You do not need to press Save manually during normal use.

Save	Forces an immediate save. Use before closing the browser.
Export	Downloads your entire character as a .json file. Do this after every session for a safe backup.
Import	Loads a previously exported .json file. Use to restore a backup or move your character to a different device.

Clearing your browser's site data will erase local storage. Export your character regularly.

Creating a Desktop App Shortcut

You can create a desktop shortcut so Chronicle launches with a single double-click, just like any other application. Follow the steps below:

A

Create the shortcut

Right-click on an empty area of your desktop.

Select **New** → **Shortcut**.

In the "Type the location of the item" box, paste the full path to your HTML file, or click **Browse** and navigate to it.

Click **Next**, give the shortcut a name (for example **Chronicle** or **D&D; Sheet**), then click **Finish**.

B

Change the icon (optional)

Right-click the new shortcut on your desktop and choose **Properties**.

Under the **Shortcut** tab, click the "**Change Icon...**" button.

Click **Browse**, navigate to the folder where Chronicle's files are stored, and select one of the included icon files.

Click **OK** on all dialogs to confirm.

Available Icons

Four icon files are included in the application folder. Choose whichever fits your campaign mood:

Camp (Tent)	<i>A campfire and tent silhouette. Good for exploration-heavy campaigns.</i>
Dice	<i>Classic polyhedral dice. The universal D&D; symbol.</i>
Dragon	<i>A rampant dragon. For high-fantasy epic campaigns.</i>
Sword	<i>A crossed sword. Clean and combat-focused.</i>

Full-Screen Tip (F11)

F11

Press **F11** after opening Chronicle in Chrome to switch to full-screen mode. All browser toolbars, the address bar, and tab bar disappear. Your entire screen becomes the character sheet.

Press F11 again at any time to restore the normal browser view.

What's Inside

Chronicle includes a full suite of tools for both players and Dungeon Masters. Everything is accessible from the sidebar on the left side of the screen.

Character Sheet	Ability scores, skills, saving throws, HP, AC, death saves, conditions, exhaustion, inspiration, and backstory.
Combat & Skills	Skill checks, passive senses, concentration tracker, bardic inspiration, damage resistances.
Equipment	Weapons, armor, inventory with category filters, encumbrance tracking, currency, and magic items.
Spellbook	Spell slots, cantrips, leveled spells with upcast support, multiclass slot calculator, pact magic.
Features & Abilities	Class features, racial traits, feats, background features, and active abilities.
Wild Shape	Druid beast form tracker with independent HP, stats, and quick HP adjustment buttons.
Battle Tracker	Initiative order strip, HP tracking per combatant, conditions, drag-and-drop reordering.
Dice Roller	Roll any die (d4 through d100), with advantage / disadvantage, modifiers, and full roll history.
Notes & Journal	NPCs, quests, journal entries, lore notes, player notes, and a bestiary with search and pagination.
Time & Calendar	In-game clock, Forgotten Realms / Greyhawk / Standard calendar, weather, seasons, holidays.
Companions	Manage familiars, mounts, pets, summons, and undead thralls with full stat blocks and HP.
Achievements	100+ unlockable challenges across Adventure, Combat, Class, Race, Economy, and more categories.

Good Luck With Your Rolls
